EPIDEMIOLOGY 2ND EDITION

Petra Büttner & Reinhold Muller

THE CAIRNS INSTITUTE

Building D3, James Cook University
McGregor Road, Smithfield
4.00pm, Tuesday 17 November 2015

Contact and RSVP: Sally McDonald sally.mcdonald@jcu.edu.au

Epidemiology 2nd edition is a methodological and practical guide to conducting evidence-based quantitative research in all health sciences. With a multidisciplinary focus, it integrates a wealth of case studies and examples to demonstrate the application of theory to real-life research and draws from a broad spectrum of health disciplines. The book follows a two level 'methods based' approach which clearly differentiates between introductory knowledge that all students of epidemiology should be familiar with and "beyond the basics" information for the interested or more advanced reader.
